**Supplemental Table 2** Fasting total cholesterol, HDL-cholesterol, LDL-cholesterol and hsCRP values of the overweight and slightly obese men who completed the study\(^a\).

| Variables                  | High-fat\(^b\) | High-carbohydrate | High-protein |
|----------------------------|----------------|-------------------|--------------|
| Total cholesterol (mmol/L) | 5.12 ± 0.83    | 5.25 ± 0.90       | 5.31 ± 0.86  |
| HDL-cholesterol (mmol/L)   | 1.20 ± 0.28    | 1.18 ± 0.26       | 1.20 ± 0.26  |
| LDL-cholesterol (mmol/L)   | 3.35 ± 0.78    | 3.45 ± 0.73       | 3.55 ± 0.79  |
| hsCRP (mg/L)               | 1.87 ± 2.25    | 1.88 ± 1.73       | 1.52 ± 1.20  |

\(^a\) HDL: High-density lipoprotein; LDL: low-density lipoprotein; hsCRP; high sensitive C-reactive protein.

\(^b\) Values are means ± SD.
