In this article which was published in Cell J, Vol 16, No 2, Summer 2014, on pages 111-116, the title of table 3 was published incorrectly as: "Sperms concentration, vitality, survival and morphology in Zanjani viper, (mean ± SD)". The correct one is "Sperm motility rate in three different parts of vas deferens duct in Zanjani viper".

Table 3: Sperm motility rate in three different parts of vas deferens duct in Zanjani viper

| Motile sperm in first region of right duct (%)** | 50.62 (0-63) | Left duct (%) | 51.14 (48-54) |
|-----------------------------------------------|--------------|---------------|---------------|
| Grade A                                      | 2.06 (0-13)  | 1.42 (0-7)    |
| Grade B                                      | 1.93 (0-4)   | 2.143 (0-4)   |
| Grade C                                      | 46.62 (0-54) | 47.57 (43-51) |
| Grade D (immotile sperm)                     | 49.37 (0-75) | 48.86 (46-52) |

| Motile sperm in middle region of right duct (%)** | 54 (0-66) | Left duct (%) | 50 (48-52) |
|---------------------------------------------------|----------|---------------|------------|
| Grade A                                           | 4.58 (0-13) | 0.38 (0-3) |
| Grade B                                           | 3.29 (0-8) | 2.00 (0-3)   |
| Grade C                                           | 46.11 (0-53) | 47.63 (44-49) |
| Grade D (immotile sperm)                          | 46 (0-57) | 50 (48-52)   |

| Motile sperm in final region of right duct (%)** | 55 (0-85) | Left duct (%) | 49.37 (44-54) |
|---------------------------------------------------|----------|---------------|------------|
| Grade A                                           | 4.16 (0-27) | 0.00         |
| Grade B                                           | 3.83 (0-13) | 2.75 (0-8)   |
| Grade C                                           | 47 (37-57) | 46.62 (42-54) |
| Grade D (immotile sperm)                          | 45 (15-53) | 50.62 (46-56) |

**; There is no significant difference in motility rate among three different parts of ducts at p> 0.05.
