Table 1: Scattering lengths in adult zebrafish brain

| Excitation Wavelength | Age/size       | Telencephalon | Optic tectum | Cerebellum |
|------------------------|----------------|---------------|--------------|------------|
| 1300nm                 | 4 months/20.9 mm | 176 µm        | 158 µm       | NA         |
| 1300nm                 | 3 months/21.8 mm | 300 µm        | 176 µm       | 157 µm     |
| 1300nm                 | 6 months/16.9 mm | 333 µm        | 158 µm       | 150 µm     |
| 1700nm                 | 3 months/ND     | NA            | 200 µm       | NA         |
| 1700nm                 | 7 months/23.5 mm | 428 µm        | 200 µm       | 157 µm     |
