Supplementary Figure 1. Kaplan-Meier survival curves. (A) Kaplan-Meier survival curves for cardiovascular mortality according to IDWG/DW (84.6% vs. 82.4%, log-rank test, p = 0.79). (B) Kaplan-Meier survival curves for cardiovascular mortality according to the medians of log-aldosterone stratified by the absence of volume overload (100% vs. 69.2%, log-rank test, p = 0.03). IDWG, interdialytic weight gain; DW, dry weight.
