Supplementary table. P-values of scan time (minutes:seconds) and amount of data (number of polygon points) concerning different patient variables.

|                      | scan time p-value | n of polygon points p-value |
|----------------------|-------------------|-----------------------------|
| Gender               | 0.2029            | 0.5877                      |
| Dentition phase      | 0.2989            | 0.0149                      |
| Jaw                  | 0.1355            | <0.0001                     |
| Angle class          | 0.3305            | 0.4884                      |

P-values from Mann-Whitney U test or the Kruskal-Wallis test
