S4 Table for descriptive output for psychosocial risk factors of the B40 respondents from the Petaling district (n=432)

| Variables                          | Total | n (%)  | Mean (SD) / Median (IQR) |
|-----------------------------------|-------|--------|-------------------------|
| Religiosity                       | 432   |        | 17.0 (5.0)$^1$          |
| Religiosity category              | 432   |        |                         |
| Low (< 17)                        | 432   | 182 (42.1) |                          |
| High (≥ 17)                       | 432   | 250 (57.9)  |                          |
| Poverty attribution Average       | 431   |        | 3.4 (0.6)$^1$          |
| Poverty attribution (Structural)  | 431   |        | 3.6 (0.9)$^1$          |
| Poverty attribution (Socioeconomic) Average | 431   |        | 3.8 (0.8)$^1$          |
| Poverty attribution (Individualistic) Average | 431   |        | 3.4 (1.1)$^1$          |
| Poverty attribution (Fatalistic)  | 431   |        | 3.0 (1.0)$^1$          |
| Health literacy                   | 428   |        |                         |
| Average                           | 428   |        | 3.0 (0.6)$^1$          |
| Health literacy index             | 428   |        | 33.4 (10.8)$^1$        |
| Help seeking (MHSAS)              | 429   |        |                         |
| Total                             | 429   |        | 54.0 (18.0)$^2$        |
| Average                           | 429   |        | 6.0 (2.0)$^2$          |
| Self-stigma (SSOSHS)              | 430   |        |                         |
| Total                             | 430   |        | 24.9 (5.8)$^1$         |
| Average                           | 430   |        | 2.5 (0.6)$^1$          |
| Resilience                        | 429   |        |                         |
| Total                             | 429   |        | 73.2 (14.7)$^1$        |
| Categorical                       |       |        |                         |
| Low                               | 133   | (31.0) |                         |
| Moderate                          | 162   | (37.8) |                         |
| High                              | 134   | (31.2) |                         |

$^1$ = Mean (SD); $^2$ = Median (IQR).
