Supplementary Material

Supplementary Figure 1 - Scheme of algorithm development and validation
Supplementary Figure 2 – Stratification of patients (training cohort + validation cohort) according to NIH consensus and IR score risk. Panel A patients classified with mild NIH cGvHD. Panel B patients classified with moderate NIH cGvHD. Panel C patients classified with severe NIH cGvHD.
NIH severe
56 pts
(cGVHD related death 14)

IR score low
10 pts
(cGVHD related death 2)

IR score Int
18 pts
(cGVHD related death 1)

IR score High
28 pts
(cGVHD related death 11)

Need of 2nd/line
7 pts

Need of 2nd/line
