Supplementary figure 2 Differentially expressed genes of CK-5 vs. A2-5. (A) Gene ontology (GO) annotation of DEGs in CK-5 vs. A2-5. (B) Top 20 term of GO enrichment of DEGs in CK-5 vs. A2-5. (C) Kyoto Encyclopedia of Genes and Genomes (KEGG) annotation of DEGs in CK-5 vs. A2-5. (D) Top 20 term of KEGG enrichment of DEGs in CK-5 vs. A2-5. The size of the bubble indicates the number of genes, the blue depth represents the size of the Q-value.
