| Position | Anatomic Site          |
|---------|------------------------|
| A-1     | Cerebellum             |
| A-2     | Small intestine        |
| A-3     | Lung                   |
| A-4     | Pituitary gland        |
| A-5     | Spleen                 |
| A-6     | Umbilical cord         |
| B-1     | Cerebral cortex        |
| B-2     | Stomach                |
| B-3     | Liver                  |
| B-4     | Parathyroid            |
| B-5     | Spinal cord            |
| B-6     | Thyroid                |
| B-7     | Tonsil                 |
| C-1     | Bone marrow            |
| C-2     | Fallopian tube         |
| C-3     | Kidney                 |
| C-4     | Pancreas               |
| C-5     | Skin                   |
| C-6     | Thymus                 |
| C-7     | Endometrium            |
| D-1     | Urinary                |
| D-2     | Breast                 |
| D-3     | Heart                  |
| D-4     | Ovary                  |
| D-5     | Prostate gland         |
| D-6     | Testis                 |
| D-7     | Uterus, cervix         |
| E-1     | Adrenal gland          |
| E-2     | Breast                 |
| E-3     | Colon                  |
| E-4     | Lymph node             |
| E-5     | Placenta               |
| E-6     | Skeletal muscle        |
| E-7     | Ureter                 |

Small intestine (A-2)  Kidney (C-3)  Testis (D-6)
Supplemental Fig. 2. Immunohistochemical analysis of ACE2 and TMPRSS2 using the tissue array of various human organs. (A) Thirty four organs on the tissue array slide. (B) Immunohistochemistry of ACE2. (C) Immunohistochemistry results of TMPRSS2 (scale bar = 4 mm; tissue array slide, 100 μm; selected organs).
