Abstract
We report 63 species of Curculionoidea that are new to New Brunswick (three species of Anthribidae, four species of Brentidae, three species of Dryophthoridae, three species of Brachyceridae, 50 species of Curculionidae). Among these are 27 species (two Anthribidae, two Brentidae, one Brachyceridae, 22 Curculionidae) that are also newly recorded for the Maritime provinces, and one species, *Plesiobaris disjuncta* Casey (Curculionidae) that is newly recorded for Canada from New Brunswick and Quebec. *Bagous planatus* LeConte is reinstated to the faunal list of New Brunswick. Two species of Curculionidae are newly recorded from Nova Scotia and the Maritime provinces, and two others are reported for the first time for Prince Edward Island.

Introduction

The Curculionioidea, or weevils, occurring in New Brunswick include the families Ne-monychidae (the pine flower snout beetles), Anthribidae (the fungus weevils), Attelabidae (the leaf-rolling weevils), Brentidae (the straight-snouted weevils and pear-shaped weevils), and the Dryophthoridae, Brachyceridae, and Curculionidae, previously, all considered members of the Curculionidae (weevils or snout beetles and bark beetles) by Anderson (2002). The classification used here follows the synthesis of Bouchard et al. (2011), based on changes proposed by Thompson (1992), Kuschel (1995), Lawrence and Newton (1995), and Alonso-Zarazaga and Lyal (1999). The weevils of New Brunswick were reviewed by Majka et al. (2007b). They reported 77 new species records for the province, increasing the weevil fauna to 206 species. Three of these species, Trichapion nigrum (Herbst), Ceutorhynchus semirufus LeConte, and Listronotus laramienis (Angell), were recorded for the first time from Canada. Bagous planatus LeConte, Plocamus hispidulus LeConte, and Dryocoetes granicollis (LeConte) were removed from the faunal list of New Brunswick due to a lack of supporting voucher specimens or other published records (Majka et al. 2007b). More recently the brentid, Arrenodes minutus (Drury) was reported from New Brunswick by Majka et al. (2008). Other Curculionoidea from Nova Scotia and Prince Edward Island were reported by Bright and Bouchard (2008), Majka (2010b), and Klimaszewski et al. (2010). Here, we report 63 species of Curculionoidea that are new to New Brunswick, two species new from Nova Scotia and two species new for Prince Edward Island.

Methods and conventions

The following records are based in part on specimens collected as part of a general survey by the first author to document the Coleoptera fauna of New Brunswick. A description of the habitat was recorded for all specimens collected during this survey and was included on specimen labels. This information is included with each record and summarized in the collection and habitat data section for each species.

Collection methods

Various collection methods were employed to collect the specimens reported in this study. Details are outlined in Webster et al. (2009, Appendix). Some specimens were collected from Lindgren funnel trap samples during a study to develop a general attractant to detect invasive species of Cerambycidae. These traps visually mimic tree trunks and are often effective for sampling species of Coleoptera that live in microhabitats associated with standing trees (Lindgren 1983). See Webster et al. (in press) for details of the methods used to deploy Lindgren 12-funnel traps and for sample collection. New
records were also obtained from the insect collection belonging to Natural Resources Canada, Canadian Forest Service - Atlantic Canada Forestry Centre, Fredericton.

**Distribution**

Distribution maps, created using ArcMap and ArcGIS, are presented for each species in New Brunswick. Every species is cited with current distribution in Canada and Alaska, using abbreviations for the state, provinces, and territories. New provincial records are indicated in bold under Distribution in Canada and Alaska. The following abbreviations are used in the text:

| Acronym | Description |
|---------|-------------|
| AK      | Alaska      |
| YT      | Yukon Territory |
| NT      | Northwest Territories |
| NU      | Nunavut |
| BC      | British Columbia |
| AB      | Alberta |
| SK      | Saskatchewan |
| MB      | Manitoba |
| ON      | Ontario |
| QC      | Quebec |
| NB      | New Brunswick |
| PE      | Prince Edward Island |
| NS      | Nova Scotia |
| NF & LB | Newfoundland and Labrador |

* Newfoundland and Labrador are each treated separately under the current Distribution in Canada and Alaska.

Acronyms of collections examined and referred to in this study are as follows:

- **AFC** Atlantic Forestry Centre, Natural Resources Canada, Canadian Forest Service, Fredericton, New Brunswick, Canada
- **CCC** Claude Chantal Collection, Varennes, Quebec, Canada
- **CNC** Canadian National Collection of Insects, Arachnids and Nematodes, Agriculture and Agri-Food Canada, Ottawa, Ontario, Canada
- **NBM** New Brunswick Museum, Saint John, New Brunswick, Canada
- **RWC** Reginald P. Webster Collection, Charters Settlement, New Brunswick, Canada

**Results**

We report 63 species of Curculionoidea new to New Brunswick (three species of Anthribidae, four species of Brentidae, three species of Dryophthoridae, three species of Brachyceridae, 50 species of Curculionidae). Among these are 27 species (two Anthribidae, two Brentidae, one Brachyceridae, 22 Curculionidae) that are also newly recorded for the Maritime provinces (New Brunswick, Nova Scotia, Prince Edward Island), and one species newly recorded for Canada (Table 1). Two species of Curculionidae are newly recorded for Nova Scotia and two for Prince Edward Island.
Species accounts

All records below are species newly recorded for New Brunswick, Nova Scotia, or Prince Edward Island, Canada, unless noted otherwise (additional records). Species followed by ** are newly recorded from the Maritime provinces; species followed by *** are newly recorded for Canada.

**Table 1.** Species of Nemonychidae, Anthribidae, Attelabidae, Brentidae, Dryophthoridae, Brachyceridae, and Curculionidae (Curculionoidea) recorded from New Brunswick, Prince Edward Island, and Nova Scotia, Canada.

Family Antribidae Billberg, 1820
Subfamily Anthribinae Billberg, 1820
Tribe Tropiderini Lacordaire, 1865

*Eurymycter latifascia* Pierce, 1930
http://species-id.net/wiki/Eurymycter_latifascia

**Material examined.** New Brunswick, Charlotte Co., 10 km NW of New River Beach, 45.2110°N, 66.6170°W, 31.V–15.VI.2010, R. Webster & C. MacKay, old growth eastern white cedar forest, Lindgren funnel trap (1, RWC).

**Collection and habitat data.** *Eurymycter* spp. feed on *Daldinia* and *Hypoxylon* spp. fungi (Xylariaceae) (Valentine 1999). This species was captured in a Lindgren funnel trap deployed in an old-growth eastern white cedar (*Thuja occidentalis* L.) forest in June.

**Distribution in Canada and Alaska.** ON, QC, NB, NS (McNamara 1991a; Bright 1993).

Tribe Zygaenodini Lacordaire, 1865

*Ormiscus saltator* LeConte, 1876**
http://species-id.net/wiki/Ormiscus_saltator

**Material examined.** New Brunswick, York Co., 15 km W of Tracy off Rt. 645, 45.6848°N, 66.8821°W, 13–27.VII.2010, R. Webster & C. MacKay, old red pine forest, Lindgren funnel traps (2, RWC).

**Collection and habitat data.** This species was captured during July in Lindgren funnel traps in an old red pine (*Pinus resinosa* Ait.) forest.

**Distribution in Canada and Alaska.** ON, QC, NB (McNamara 1991a).

Subfamily Choraginae Kirby, 1819
Tribe Choragini Kirby, 1819

*Choragus sayi* LeConte, 1876**
http://species-id.net/wiki/Choragus_sayi

**Material examined.** New Brunswick, Charlotte Co., 10 km NW of New River Beach, 45.2110°N, 66.6170°W, 16–26.VII.2010, R. Webster & C. MacKay, old growth eastern white cedar forest, Lindgren funnel trap (1, RWC). Queens Co.,
Grand Lake Meadows P.N.A. (Protected Natural Area), 45.8227°N, 66.1209°W, 26.VII–7.VIII.2010, R. Webster, old silver maple forest with green ash and seasonally flooded marsh, Lindgren funnel trap (1, RWC); same locality data and forest type, M. Roy & V. Webster, 19.VII–5.VIII.2011, Lindgren funnel traps (2, AFC, NBM); Cranberry Lake P.N.A., 46.1125°N, 65.6075°W, 29.VI–7.VII.2011, 7–13.VII.2011, 20.VII–4.VIII.2011, 4–18.VIII.2011, M. Roy & V. Webster, old red oak forest, Lindgren funnel traps (7, AFC, NBM, RWC); same locality data and forest type, C. Hughes & R. P. Webster, 18–31.VIII.2011, Lindgren funnel traps (2, RWC).

**Collection and habitat data.** This species was captured during July and August in Lindgren funnel traps in an old-growth eastern white cedar forest, an old red oak (*Quercus rubra* L.) forest, and an old silver maple (*Acer saccharinum* L.) forest.

**Distribution in Canada and Alaska.** QC, NB (Valentine 1998).

---

Family Brentidae Billberg, 1820
Subfamily Apioninae Schönherr, 1823
Tribe Apionini Schönherr, 1823

*Coelocephalapion emaciipes* (Fall, 1898)
http://species-id.net/wiki/Coelocephalapion_emaciipes
Map 4

**Material examined.** *New Brunswick, York Co.*, 15 km W of Tracy off Rt. 645, 45.6848°N, 66.8821°W, 30.V-8.VI.2011, R. Roy & V. Webster, old red pine forest, Lindgren funnel trap (1, RWC).

**Collection and habitat data.** This species is associated with tick-trefoil (*Desmodium* spp.) (Bright 1993). The specimen from New Brunswick was captured between late May and early June in a Lindgren funnel trap in an old red pine forest.

**Distribution in Canada and Alaska.** ON, NB, NS, PE (McNamara 1991b; Majka et al. 2007a; Majka 2010a). This species was newly recorded from Nova Scotia and the Maritime provinces by Majka et al. (2007a).

*Neapion frosti* (Kissinger, 1968)
http://species-id.net/wiki/Neapion_frosti
Map 5

**Material examined.** *New Brunswick, York Co.*, 15 km W of Tracy off Rt. 645, 45.6837°N, 66.8809°W, 16.VI.2007, 28.VI.2007, R. P. Webster, old red pine forest, on flowers of *Viburnum nudum* (12, NBM, RWC); Charters Settlement, 45.8430°N, 66.7275°W, 17.VI.2007, R. P. Webster, regenerating mixed forest, sweeping flowers of *Viburnum nudum* (1, RWC).
**Collection and habitat data.** *Neapion* sp. are associated with *Viburnum* (Anderson and Kissinger 2002). The New Brunswick specimens of *Neapion frosti* were collected in June from flowers of wild raisin (*Viburnum nudum* L.) in an old red pine forest and in a regenerating mixed forest.

**Distribution in Canada and Alaska.** ON, QC, NB, NS (McNamara 1991b).

*Podapion gallicola* Riley, 1883**
http://species-id.net/wiki/Podapion_gallicola
Map 6

**Material examined.** New Brunswick, Sunbury Co., Otter Brook Rd., off Little Lake Rd. emerged. 24.III.1969, reared from red pine, (no collector given) 68–2-1869–01 (1, AFC). *York Co.*, 15 km W of Tracy off Rt. 645, 45.6848°N, 66.8821°W, 14–20. VII.2009, 20–29.VII.2009, 4–11.VIII.2009, R. Webster & M.-A. Giguère, old red pine forest, Lindgren funnel traps (3, RWC); same data, but 13–27.VII.2010, 27.VII–10.VIII.2010, R. Webster & C. MacKay, old red pine forest, Lindgren funnel traps (2, RWC); 14 km WSW of Tracy, S of Rt. 645, 45.6741°N, 66.8661°W, 13–27.VII.2010, R. Webster & C. MacKay, old mixed forest with red and white spruce, red and white pine, balsam fir, eastern white cedar, red maple, and *Populus* sp., Lindgren funnel trap (1, RWC).

**Collection and habitat data.** This species is associated with *Pinus* spp., and larvae occur in galls on twigs (Anderson and Kissinger 2002). In New Brunswick, adults were captured during July and August in Lindgren funnel traps deployed in an old red pine forest and an old mixed forest with red pine. One specimen was reared from red pine.

**Distribution in Canada and Alaska.** ON, QC, NB (McNamara 1991b).

*Trichapion porcatum* (Boheman, 1839)**
http://species-id.net/wiki/Trichapion_porcatum
Map 7

**Material examined.** New Brunswick, Queens Co., near Stony Point off Rt. 690, 46.0364°N, 66.0383°W, 12.VII.2006, R. P. Webster, on foliage of *Robinia pseudoacacia* L. (2, RWC).

**Collection and habitat data.** Two individuals were beaten from foliage of black locust (*Robinia pseudoacacia* L.) during mid July.

**Distribution in Canada and Alaska.** ON, NB (McNamara 1991b).

Map 8

**Material examined.** New Brunswick, Westmorland Co., Moncton, 21.IV.1945, 24.IV.1945, R. S. Forbes (3, AFC).

**Collection and habitat data.** This introduced cosmopolitan species is a pest of stored grain products worldwide (Anderson 2002). No bionomic data are associated with the specimens of this species from New Brunswick.

**Distribution in Canada and Alaska.** BC, ON, QC, NB, NS, PE, NF (McNamara 1991c; McCorquodale et al. 2005; Majka et al. 2007c).

Tribe Sphenophorini Lacordaire, 1865

*Sphenophorus parvulus* Gyllenhal, 1838  
http://species-id.net/wiki/Sphenophorus_parvulus  
Map 9

**Material examined.** New Brunswick, York Co., Charters Settlement, 45.8395°N, 66.7391°W, 12.VII.2005, R. P. Webster, roadside, on pavement (1, RWC).

**Collection and habitat data.** *Sphenophorus parvulus* (the bluegrass billbug) feeds on Kentucky bluegrass, *Poa pratensis* L. and other grasses, and is an important turf pest in the United States (Vaurie 1951; Tashiro and Personius 1970; Kindler and Kinbacher 1975; Kindler and Spomer 1986). The specimen from New Brunswick was found on the side of a residential street during July.

**Distribution in Canada and Alaska.** ON, QC, NB, NS, (McNamara 1991c; Majka et al. 2007c).

*Sphenophorus zeae* Walsh, 1867  
http://species-id.net/wiki/Sphenophorus_zeae  
Map 10

**Material examined.** New Brunswick, York Co., Charters Settlement, 45.8404°N, 66.7360°W, 27.V.2008, R. P. Webster, medium sized brook partially shaded by alders, among *Carex* (1, RWC).
Collection and habitat data. Majka et al. (2007b) reported this species from coastal salt-spray barrens in Nova Scotia. This species feeds on grasses (Poaceae) such as *Poa pratensis* L., *Phleum pratense* L., and *Zea mays* (L.) (Vaurie 1951). The specimen from New Brunswick was found in a *Carex* hummock near a brook during May.

Distribution in Canada and Alaska. ON, QC, NB, NS, PE (McNamara 1991c; Majka et al. 2007c).

**Family Brachyceridae Billberg, 1820**
Subfamily Erirhininae Schönherr, 1825
Tribe Erirhinini Schönherr, 1825

*Notiodes ovalis* (LeConte, 1876)**
http://species-id.net/wiki/Notiodes_ovalis
Map 11

Material examined. New Brunswick, York Co., Mazerolle Settlement, 45.8765°N, 66.8260°W, 8.VI.2008, R. P. Webster, beaver meadow, sweeping vegetation along brook margin (3, RWC).

Collection and habitat data. The New Brunswick specimens of *N. ovalis* were swept from vegetation along a brook margin in a beaver (*Castor canadensis* Kuhl.) meadow during June.

Distribution in Canada and Alaska. AB, ON, QC, NB (McNamara 1991c).

*Onychylis nigrirostris* (Boheman, 1843)
http://species-id.net/wiki/Onychylis_nigrirostris
Map 12

Material examined. New Brunswick, Queens Co., Grand Lake Meadows P.N.A., 45.8227°N, 66.1209°W, 17–30.VIII.2011, C. Hughes & R. P. Webster, old silver maple forest with green ash and seasonally flooded marsh, Lindgren funnel trap (1, RWC).

Collection and habitat data. *Onychylis* spp. are associated with pickerelweed (*Pontederia cordata* L.) and pond lilies (*Nuphar* species) (Anderson 1993). The specimen from New Brunswick was captured during August in a Lindgren funnel trap in an old silver maple swamp near a seasonally flooded marsh.

Distribution in Canada and Alaska. ON, QC, NB, NS (McNamara 1991c; Majka et al. 2007c).

Tribe Tanysphyrini Gistel, 1848

*Tanysphrus lemnae* (Fabricius, 1792)
http://species-id.net/wiki/Tanysphrus_lemnae
Map 13

**Material examined.** New Brunswick, Queens Co., just W of Jemseg at “Trout Creek”, 45.8231°N, 66.1245°W, 11.IV.2006, R. P. Webster, silver maple swamp, sifting litter from silver maple with multiple trunks (1, RWC); Grand Lake Meadows P.N.A., 45.8227°N, 66.1209°W, 29.VI–12.VII.2010, R. Webster, C. MacKay, M. Laity & R. Johns, old silver maple forest with green ash and seasonally flooded marsh, Lindgren funnel traps (1, AFC). York Co. Charters Settlement, 45.8456°N, 66.7267°W, 1.V.2010, 5.V.2010, R. P. Webster, beaver pond, on *Lemna* sp. on pond margin (6, RWC).

**Collection and habitat data.** This species is associated with *Lemna* spp. (Lemnaceae) (Anderson 2002). Most of the specimens from New Brunswick were found on *Lemna* sp. floating on water near the margin of a beaver pond during May. One individual was sifted from litter in the crotch of a silver maple with multiple trunks during mid April (probably an overwintering site) and another was captured during July in a Lindgren funnel trap in an old silver maple swamp.

**Distribution in Canada and Alaska.** BC, AB, SK, MB, ON, QC, NB, NS (McNamara 1991c; Majka et al. 2007c).

Family Curculionidae Latreille, 1802
Subfamily Curculioninae Latreille, 1802
Tribe Anthonomini Thomson, 1859

*Anthonomus haematopus* Boheman, 1843
http://species-id.net/wiki/Anthonomus_haematopus
Map 14

**Material examined.** New Brunswick, Charlotte Co., near Clark Ridge, 45.3040°N, 67.4252°W, 27.V.2007, R. P. Webster, old field, on *Salix* foliage (1, RWC). Gloucester Co., Bass River, 20.III.1970, (no collector given) reared from willow (1, AFC). Restigouche Co., Jacquet River Gorge P.N.A., 47.8204°N, 66.0833°W, 14.VI.2009, R. P. Webster, river margin, beating foliage (1, RWC). York Co. Charters Settlement, 45.8430°N, 66.7275°W, 17.VI.2007, R. P. Webster, regenerating mixed forest, sweeping foliage in brushy opening (1, RWC).

**Collection and habitat data.** *Anthonomus haematopus* is associated with galls on *Salix* spp. generated by sawflies (Ahmad and Burke 1972). Adults from New Brunswick were collected in an old field, along a river margin, and in a brushy opening in a
regenerating mixed forest. One specimen was on Salix foliage, another was reared from Salix. Adults were collected during May and June.

**Distribution in Canada and Alaska.** BC, AB, SK, MB, ON, QC, NB, NS (McNamara 1991c).

*Anthonomus subfuscatus* LeConte, 1876
http://species-id.net/wiki/Anthonomus_subfuscatus
Map 15

**Material examined.** New Brunswick, Sunbury Co., Lakeville Corner, 45.9008°N, 66.2414°W, 12.VII.2006, R. P. Webster, silver maple swamp on ridge with red maple and red oak, on flowers of *Spiraea alba* (12, NBM, RWC); 9.5 km NE jct. Rt. 101 & 645, 45.7586°N, 66.6755°W, 29.VII.2007, R. P. Webster, old field with open sandy areas, sweeping (1, AFC). **York Co.,** Rt. 645 at Beaver Brook, 45.6860°N, 66.8668°W, 8.VII.2008, 13.VIII.2008, R. P. Webster, sedge marsh, on flowers of *Spiraea alba* (2, RWC); 15 km W of Tracy off Rt. 645, 45.6848°N, 66.8821°W, 4–16.VI.2010, R. Webster & C. MacKay, coll., old red pine forest, Lindgren funnel trap (1, AFC).

**Collection and habitat data.** This species has been collected from *Viburnum dentatum* L. (Ahmad and Burke 1972). In New Brunswick, this species was common on flowers of meadow-sweet (*Spiraea alba* Du Roi) at two localities. Adults were collected during July and August.

**Distribution in Canada and Alaska.** ON, QC, NB, NS (McNamara 1991c; Majka et al. 2007c).

**Tribe Curculionini Latreille, 1802**

*Curculio obtusus* (Blanchard, 1884)**
http://species-id.net/wiki/Curculio_obtusus
Map 16

**Material examined.** New Brunswick, Carleton Co., Bellville, Meduxnekeag Valley Nature Preserve, 46.1890°N, 67.6766°W, 8.VI.2005, 4.VII.2005, R. Webster & M.-A. Giguère, floodplain forest, beating foliage of *Corylus cornuta* (2, RWC); same locality, but 46.1931°N, 67.6825°W, 25.VI.2007, R. P. Webster, floodplain forest, beating foliage of *Corylus cornuta* (2, RWC). **Queens Co.,** Cranberry Lake P.N.A., 46.1125°N, 65.6075°W, 15–21.VII.2009, R. Webster & M.-A. Giguère, old red oak forest, Lindgren funnel trap (1, RWC); same locality data and forest type but 18.VI.2009, R. Webster & M.-A. Giguère, sweeping foliage (1, AFC); same locality data and forest type 29.VI-7.VII.2011, 7–13.VII.2011, 20.VII-4.VIII.2011, M. Roy & V. Webster, Lindgren funnel traps (3, AFC, NBM, RWC). **York Co.,** Canterbury, near “Browns
Mountain Fen", 45.8978°N, 67.6273°W, 3.VII.2005, R. Webster & M.-A. Giguère, mixed forest, on foliage of Corylus cornuta (1, RWC).

Collection and habitat data. Most adults from New Brunswick were collected by beating foliage of beaked hazelnut (Corylus cornuta Marsh.) or sweeping foliage near this shrub. Some adults were collected in Lindgren funnel traps in an old red oak forest with abundant C. cornuta in the understory. Adults were collected during June, July, and August.

Distribution in Canada and Alaska. MB, ON, QC, NB (McNamara 1991c).

Tribe Ellescini Thomson, 1859

Ellescus ephippiatus (Say, 1831)**
http://species-id.net/wiki/Ellescus_ephippiatus
Map 17

Material examined. New Brunswick, Carleton Co., Medunxnekeag Valley Nature Preserve, 46.1878°N, 67.6705°W, 18.VIII.2008, R. P. Webster, hardwood forest, sweeping (1, RWC). Queens Co., Cranberry Lake P.N.A., 46.1125°N, 65.6075°W, 3–13.V.2011, 13–25.V.2011, M. Roy & V. Webster, old red oak forest, Lindgren funnel trap in forest canopy (trap in a big toothed aspen) (15, AFC, NBM, RWC). York Co., Fredericton, 12.V.1921, 19.V.1921, 20.V.1921, R.P.G. (16, AFC).

Collection and habitat data. Species in this genus are associated with Salix and Populus spp. (Anderson 2002). The only adult from New Brunswick with bionomic data was swept from foliage in a hardwood forest. Other individuals were captured in Lindgren funnel traps in an old red oak forest deployed in the canopy of a large-toothed aspen (Populus grandidentata Michx.) Adults were collected during May and August.

Distribution in Canada and Alaska. MB, ON, QC, NB (McNamara 1991c).

Dorytomus frostii Blatchley, 1916**
http://species-id.net/wiki/Dorytomus_frostii
Map 18

Material examined. New Brunswick, Sunbury Co., Acadia Station, emerged 5.V.1958, 6.V.1958, 7.V.1958, 9.V.1958, 12.V.1958 (no collector given), reared from Populus tremuloides, F.I.S., 58–0045–01 (2, AFC).

Collection and habitat data. O’Brien (1970) reported trembling aspen, Populus tremuloides Michx. as the host of this species. Specimens of this species were reared from P. tremuloides in New Brunswick.

Distribution in Canada and Alaska. YK, NT, BC, AB, SK, MB, ON, QC, NB (McNamara 1991c).

**Dorytomus laticollis** LeConte, 1876
http://species-id.net/wiki/Dorytomus_laticollis
Map 19

**Material examined.** New Brunswick, Sunbury Co., Acadia Station, emerged 5.V.1958, 6.V.1958, 7.V.1958, 9.V.1958, 12.V.1958, (no collector given) reared from *Populus tremuloides*, F.I.S., 58–0045–01 (48, AFC). York Co., Durham (Bridge), 22.VII.1958, G. W. Barter, ex. *Populus tremuloides* (1, AFC); Kingsley, 14.VIII.1964, Titus, ex. willow (hand picked) F.I.S. 64–1568–04 (1, AFC).

**Collection and habitat data.** O’Brien (1970) reported trembling aspen as the host of this species. A large series of this species from New Brunswick was reared from *P. tremuloides*. Emergence dates were during May and July.

**Distribution in Canada and Alaska.** AK, BC, AB, SK, MB, ON, QC, NB, NS (McNamara 1991c; Majka et al. 2007c).

---

**Dorytomus luridus** Mannerheim, 1853
http://species-id.net/wiki/Dorytomus_luridus
Map 20

**Material examined.** New Brunswick, Queens Co., Cranberry Lake P.N.A., 46.1125°N, 65.6075°W, 29.VI-7.VII.2011, M. Roy & V. Webster, old red oak forest, Lindgren funnel trap in forest canopy (1, RWC).

**Collection and habitat data.** O’Brien (1970) reported *Salix* as the host of this species. The specimen from New Brunswick was captured during July in a Lindgren funnel trap in the canopy of a red oak in an old red oak forest. *Salix* was present nearby along a roadside through the red oak stand.

**Distribution in Canada and Alaska.** AK, YK, NT, BC, AB, SK, QC, NB, NS (McNamara 1991c).

---

**Dorytomus marmoreus** Casey, 1892
http://species-id.net/wiki/Dorytomus_marmoreus
Map 21

**Material examined.** New Brunswick, Queens Co., Cranberry Lake P.N.A., 46.1125°N, 65.6075°W, 20.VII–4.VIII.2011, M. Roy & V. Webster, old red oak forest, Lindgren funnel trap in forest canopy (1, RWC).

**Collection and habitat data.** O’Brien (1970) did not report any host associations for this species. However, hosts of other North American species of *Dorytomus* are either *Salix* or *Populus* (O’Brien 1970). The specimen from New Brunswick was captured between late July and early August in a Lindgren funnel trap in the canopy.
of a red oak in an old red oak forest. *Salix* and *Populus* were present in or near the red oak stand.

**Distribution in Canada and Alaska.** AK, AB, ON, QC, NB, NS (McNamara 1991c).

**Tribe Mecinini Gistel, 1848**

*Cleopomiarus hispidulus* **(LeConte, 1876)**

http://species-id.net/wiki/Cleopomiarus_hispidulus

Map 22

Material examined. New Brunswick, Queens Co., Cranberry Lake P.N.A., 46.1125°N, 65.6075°W, 15–21.VII.2009, R. Webster & M.-A. Giguère, mature red oak forest, Lindgren funnel trap (1, RWC). York Co., Charters Settlement, 45.8430°N, 66.7275°W, 17.VI.2007, R. P. Webster, regenerating mixed forest, sweeping foliage in brushy opening (3, RWC).

**Collection and habitat data.** Larvae of this species feed in seed capsules of *Lobelia* (Campanulaceae) (Anderson 1973). The New Brunswick adults were collected during June and July from a Lindgren trap sample in an old red oak forest and by sweeping foliage in a brushy opening in a regenerating forest.

**Distribution in Canada and Alaska.** MB, ON, QC, NB (McNamara 1991c).

**Tribe Piazorhinini Lacordaire, 1863**

*Piazorhinus pictus* **LeConte, 1876**

http://species-id.net/wiki/Piazorhinus_pictus

Map 23

Material examined. New Brunswick, Queens Co., Cranberry Lake P.N.A., 46.1125°N, 65.6075°W, 14–19.VIII.2009, R. Webster & M.-A. Giguère, mature red oak forest, Lindgren funnel traps (2, RWC); same locality data and forest type, 20.VII-4.VIII.2011, 4–18.VIII.2011, 18–31.VIII.2011, 31.VIII-15.IX.2011, M. Roy & V. Webster, Lindgren funnel traps (9, AFC, NBM, RWC).

**Collection and habitat data.** This species is associated with *Quercus* (Anderson 1993). Adults from New Brunswick were captured during July, August (most during August), and September in Lindgren funnel traps in an old red oak forest.

**Distribution in Canada and Alaska.** MB, ON, QC, NB, NS (McNamara 1991c; Majka et al. 2007b).
Subfamily Bagoinae Thomson, 1859

*Bagous americanus* LeConte, 1876

The specimen of *Bagous americanus* reported in Majka et al. (2007b) was misidentified by C. G. Majka and is *Bagous planatus* LeConte. *Bagous americanus* is accordingly removed from faunal list of New Brunswick.

*Bagous obliquus* LeConte, 1876**

http://species-id.net/wiki/Bagous_obliquus

Map 24

**Material examined.** New Brunswick, York Co., Charters Settlement, 45.8430°N, 66.7275°W, 17.VI.2007, R. P. Webster, regenerating mixed forest, sweeping foliage in brushy opening (1, RWC).

**Collection and habitat data.** *Bagous* spp. are associated with wetland plants such as *Nymphaea* (Nymphaeaceae), *Eleocharis* and *Carex* (Cyperaceae), and *Potamogeton* (Potamogetonaceae) (O’Brien and Marshall 1979). The specimen of *Bagous obliquus* from New Brunswick was swept from foliage in a brushy opening in a regenerating mixed forest (20 years old) near a small marsh in June.

**Distribution in Canada and Alaska.** ON, QC, NB (McNamara 1991c).

*Bagous planatus* LeConte, 1876**

http://species-id.net/wiki/Bagous_planatus

Map 25

**Material examined.** New Brunswick, Charlotte Co., near Clark Ridge, 45.3155°N, 67.4406°W, 27.V.2007, R. P. Webster, beaver pond, treading (marsh) vegetation (1, RWC). Sunbury Co., Maugerville, Portobello Creek N.W.A. (National Wildlife Area), 45.8992°N, 66.4248°W, 24.VI.2004, R. P. Webster, silver maple forest, margin of slow river under litter on muddy soil (1, RWC).

**Collection and habitat data.** Adults were collected along the margin of a beaver pond by treading marsh vegetation. Others were found under leaf litter on the margin of a slow flowing river. Adults were captured during May and June.

**Distribution in Canada and Alaska.** ON, QC, NB (McNamara 1991c). Majka et al. (2007b) removed *B. planatus* from the faunal list of New Brunswick due to an absence of a supporting voucher specimen. The above records establish this species as a member of the New Brunswick fauna.

Tribe Apostasimerini Schönheit, 1844

Cylindridia prolixa (LeConte, 1876)
http://species-id.net/wiki/Cylindridia_prolixa
Map 26

Material examined. New Brunswick, Gloucester Co., Caraquet, near the Acadian Historical Village, 47.7887°N, 65.0756°W, 28.VI.2006, 29.VI.2007, R. P. Webster, salt marsh, on foliage of Carex paleacea (13, AFC, RWC).

Collection and habitat data. This species is associated with sedges (Cyperaceae) (Anderson 2002). In New Brunswick, adults were collected during June from the foliage of Carex paleacea in a salt marsh.

Distribution in Canada and Alaska. MB, ON, QC, NB, NS (McNamara 1991c; Majka 2007c).

Odontocorynus salebrosus (Casey, 1892)**
http://species-id.net/wiki/Odontocorynus_salebrosus
Map 27

Material examined. New Brunswick, York Co., Charters Settlement, 45.8340°N, 66.7740°W, 25.VII.2007, R. P. Webster, mature red spruce and red maple forest in old field opening, sweeping foliage (2, RWC).

Collection and habitat data. Adults were collected by sweeping an old-field opening in a mixed forest area during July.

Distribution in Canada and Alaska. AB, ON, MB, NB, QC, SK (Prena 2008).

Tribe Baridini Schönheit, 1836

Plesiobaris disjuncta Casey, 1892***
http://species-id.net/wiki/Plesiobaris_disjuncta
Map 28

Material examined. CANADA, New Brunswick, Carleton Co., Belleville, Meduxnekeag Valley Nature Preserve, 46.1888°N, 67.6762°W, 27.VIII.2007, R. P. Webster, upper river margin, sweeping (2, RWC).

Quebec, Verchères (Co.), Varennes, 5.VI.2006, 13.VI.2006, 21.VI.2006, 29.VI.2006, 26.VI.2008, C. Chantal sweeping (5, CCC).

Collection and habitat data. Species in this genus are associated with Hypericum (Hypericaceae) in wetlands (Anderson 2002). In New Brunswick, adults were col-
lected by sweeping foliage along a river margin during late August. Specimens from Quebec were collected by sweeping during June.

**Distribution in Canada and Alaska.** QC, NB (new Canadian records).

---

**Subfamily Ceutorhynchinae Gistel, 1848**

**Tribe Ceutorhynchini Gistel, 1848**

*Ceutorhynchus obstrictus* (Marsham, 1802)**

http://species-id.net/wiki/Ceutorhynchus_obstrictus

Map 29

**Material examined. New Brunswick, Carleton Co., Bellville, Meduxnekeag Valley Nature Preserve, 46.1890°N, 67.6764°W, 2.VI.2008, R. P. Webster, river margin, on wild mustard (1, RWC). Gloucester Co., Caraquet, near the Acadian Historical Village, 47.7887°N, 65.0756°W, 28.VI.2006, 29.VI.2007, R. P. Webster, inland margin of salt marsh, sweeping (1, RWC).**

**Collection and habitat data.** The invasive *C. obstrictus* (cabbage seedpod weevil) is a serious pest of canola (*Brassica napus* L.) and oilseed rape (*Brassica rapa* L.) in North America (Cárcamo et al. 2001; Brodeur et al. 2001; Dosdall et al. 2002; Dosdall et al. 2006). In New Brunswick, adults were found on wild mustard on a river margin and swept from foliage on the inland margin of a salt marsh. Adults were collected during June.

**Distribution in Canada and Alaska.** BC, AB, SK, ON, QC, NB (McLeod 1962; Butts and Byers 1996; Brodeur et al. 2001; Dosdall et al. 2002; Mason et al. 2003). The species was first reported (as *Ceutorhynchus assimilis* Paykull) in North America from the the lower mainland of British Columbia, Canada in 1931 (McLeod 1962) and had become well established in Quebec by 2000 (Brodeur et al. 2001).

Tribe Lechriopini Lacordaire, 1865

**Lechriops oculata** (Say, 1824)
http://species-id.net/wiki/Lechriops_oculata
Map 31

**Material examined. New Brunswick, Charlotte Co.,** 10 km NW of New River Beach, 45.2110°N, 66.6170°W, 30.IV–17.V.2010, R. Webster & V. Webster, old growth eastern white cedar forest, Lindgren funnel traps (2, AFC, RWC). **York Co.,** 15 km W of Tracy off Rt. 645, 45.6848°N, 66.8821°W, 16–30.VI.2010, R. Webster & C. MacKay, old red pine forest, Lindgren funnel trap (1, RWC).

**Collection and habitat data.** This species is associated with hardwood trees, such as oak (**Quercus** sp.), ash (**Fraxinus** sp.), and American beech (**Fagus grandifolia** Ehrh.) (**Fagaceae**) (Sleeper 1963). In New Brunswick, this species was captured during May and June in Lindgren funnel traps in an old-growth eastern white cedar forest and an old-growth red pine forest. Hardwood species were present at both sites.

**Distribution in Canada and Alaska.** MB, ON, QC, NB, PE, NS (McNamara 1991c; Majka et al. 2007c).

Tribe Zygopini Lacordaire, 1865

**Cylindrocopturus longulus** (LeConte, 1876)**
http://species-id.net/wiki/Cylindrocopturus_longulus
Map 32

**Material examined. New Brunswick, York Co.,** 15 km W of Tracy off Rt. 645, 45.6848°N, 66.8821°W, 19–25.V.2009, R. Webster & M.-A. Giguère, old red pine forest, Lindgren funnel trap (1, RWC)

**Collection and habitat data.** Most species of this genus are associated with Asteraceae, but some are associated with Pinaceae (Anderson 2002). The single specimen from New Brunswick was captured during May in a Lindgren funnel trap in an old (180-year-old) red pine forest.

**Distribution in Canada and Alaska.** ON, NB (McNamara 1991c).

Subfamily Cossoninae Schönherr, 1825
Tribe Cossonini Schönherr, 1825

**Cossonus americanus** Buchanan, 1936
http://species-id.net/wiki/Cossonus_americanus
Map 33

**Material examined. New Brunswick, Queens Co.,** Cranberry Lake P.N.A., 46.1125°N, 65.6075°W, 7–22.VI.2011, 29.VI–7.VII.2011, 13–20.VII.2011, M. Roy & V. Webster,
old red oak forest, Lindgren funnel traps (3, NBM, RWC). York Co., 15 km W of Tracy off Rt. 645, 45.6848°N, 66.8821°W, 21–28.VI.2009, R. Webster & M.-A. Giguère, old red pine forest, Lindgren funnel trap (1, RWC); same locality and forest type but 16–30. VI.2010, R. Webster & C. MacKay, Lindgren funnel traps (2, AFC, RWC).

Collection and habitat data. O’Brien (1997) reported Populus balsamifera as a host for this species. Specimens of C. americanus were captured during June and July in Lindgren funnel traps in an old red pine forest and an old red oak forest.

Distribution in Canada and Alaska. QC, NB, NS, NF (McNamara 1991c).

Tribe Onycholipini Wollaston, 1873

Stenoscelis brevis (Boheman, 1845)
http://species-id.net/wiki/Stenoscelis_brevis
Map 34

Material examined. New Brunswick, Queens Co., Grand Lake Meadows P.N.A., 45.8227°N, 66.1209°W, 29.VI–12.VII.2010, 12–26.VII.2010, 26.VI–7.VIII.2010, R. Webster, C. MacKay, M. Laity & R. Johns, old silver maple forest with green ash and seasonally flooded marsh, Lindgren funnel traps (45, AFC, RWC); same locality data and forest type, 5–19.VII.2011, 19.VII–5.VIII.2011, M. Roy & V. Webster, Lindgren funnel traps (7, NBM, RWC).

Collection and habitat data. This species occurs under bark or in dead wood of a variety of hardwood species such as apple, hawthorn (Crataegus), elm (Ulmus), ash, maple (Acer), and oak (O’Brien 1997). In New Brunswick, a large series of adults was captured during July and August in Lindgren funnel traps in a silver maple swamp.

Distribution in Canada and Alaska. ON, QC, NB, NS (McNamara 1991c; Majka et al. 2007c).

Tribe Rhyncolini Gistel, 1848

Himatium errans LeConte, 1876

Webster, old red oak forest, Lindgren funnel trap (1, RWC). Restigouche Co., Dionne Brook P.N.A., 47.9030°N, 68.3503°W, 27.VI–14.VII.2011, 14–28.VII.2011, M. Roy & V. Webster, old-growth northern hardwood forest, Lindgren funnel traps (2, RWC). York Co., 14 km WSW of Tracy, S of Rt. 645, 45.6741°N, 66.8661°W, 2–16.VI.2010, R. Webster & C. MacKay, old mixed forest with red and white spruce, red and white pine, balsam fir, eastern white cedar, red maple, and *Populus* sp., Lindgren funnel trap (1, RWC).

**Collection and habitat data.** O’Brien (1997) reported *Populus* as a host of *Phloeophagus canadensis*. The New Brunswick adults were captured during June and July in Lindgren funnel traps in a hardwood forest, an old mixed forest, an old red oak forest, an old-growth northern hardwood forest, and an old silver maple forest. *Populus* was present at all the sites where this species was captured.

**Distribution in Canada and Alaska.** BC, AB, MB, QC, NB (McNamara 1991c).

**Phloeophagus minor** Horn, 1873**
http://species-id.net/wiki/Phloeophagus_minor
Map 38

Material examined. New Brunswick, Queens Co., Grand Lake Meadows P.N.A., 45.8227°N, 66.1209°W, 29.VI-12.VII.2010, R. Webster, C. MacKay, M. Laity, & R. Johns, old silver maple forest with green ash and seasonally flooded marsh, Lindgren funnel traps (2, RWC); same locality data and forest type, 5–19.VII.2011, M. Roy & V. Webster, Lindgren funnel traps (2, RWC).

**Collection and habitat data.** O’Brien (1997) reported this species as occurring in decaying trunks of various hardwood species such as birch (*Betula* sp.), willow (*Salix* sp.), and elm, and on dead twigs. The specimens from New Brunswick were captured during July in Lindgren funnel traps in a silver maple swamp.

**Distribution in Canada and Alaska.** ON, QC, NB (McNamara 1991c).
Subfamily Cyclominae Schönherr, 1826
Tribe Listroderini LeConte, 1876

Listronotus deceptus (Blatchley, 1916)**
http://species-id.net/wiki/Listronotus_deceptus
Map 39

Material examined. New Brunswick, Gloucester Co., Caraquet, near the Acadian Historical Village, 47.7887°N, 65.0756°W, 29.VI.2007, R. P. Webster, inland margin of salt marsh, sweeping (4, RWC).

Collection and habitat data. Little is known about the habitat associations or biology of this species. Adults from New Brunswick were swept from foliage on the inland margin of a salt marsh during late June.

Distribution in Canada and Alaska. QC, NB (O’Brien 1997).

Listronotus lutulentus (Boheman, 1843)**
http://species-id.net/wiki/Listronotus_lutulentus
Map 40

Material examined. New Brunswick, Sunbury Co., near Sunpoke Lake, 45.7662°N, 66.5526°W, 20.VI.2007, 28.VII.2007, 10.VII.2008, R. P. Webster, seasonally flooded marsh, sweeping Sagittaria species (6, RWC).

Collection and habitat data. Listronotus lutulentus has been swept from sedges (O’Brien 1997), otherwise little is known about the biology of this species. Adults from New Brunswick were swept from Sagittaria sp. in a seasonally flooded marsh during June and July.

Distribution in Canada and Alaska. MB, ON, QC, NB (McNamara 1991c).

Listronotus oregonensis (LeConte, 1876)
http://species-id.net/wiki/Listronotus_oregonensis
Map 41

Material examined. New Brunswick, Gloucester Co., East Allardville (Allardville East), 10.VI.1942, W. Raiche, on Abies balsamea, beating, F.I.S., 42–1-37 (1, AFC). Queens Co., Grand Lake Meadows P.N.A., 45.8227°N, 66.1209°W, 5–19.VII.2011, M. Roy & V. Webster, old silver maple forest and seasonally flooded marsh, Lindgren funnel trap (1, RWC). York Co. Mazerolle Settlement, 45.8729°N, 66.8311°W, 28.IV.2006, R. P. Webster, stream margin (in beaver meadow), on mud with sparse vegetation (1, RWC).
Collection and habitat data. This species, known as the carrot weevil or parsley weevil, is associated with various species of Apiaceae, Plantago spp., and Rumex spp. (O’Brien 1997; Torres and Hoy 2002). In New Brunswick, one adult was beaten from balsam fir (Abies balsamea (L.) Mill.) (probably incidental), another on mud along a stream margin in a beaver meadow, and one adult was captured in a Lindgren funnel trap in an old silver maple swamp. Adults were collected during April, June, and July.

Distribution in Canada and Alaska. MB, ON, QC, NB, PE, NS (McNamara 1991c; Majka et al. 2007c).

**Collection and habitat data.** *Conotrachelus posticatus* larvae develop in acorns of several oak species (Gibson 1964). Schoof (1942) reported that this species was associated with *Quercus*, *Carya*, *Prunus*, and *Crataegus*. Most specimens from New Brunswick were collected from Lindgren funnel traps in a red oak forest. A few individuals were swept from foliage in the understory. Adults were collected during May, June, July, and August.

**Distribution in Canada and Alaska.** ON, QC, NB, NS (McNamara 1991c; Majka et al. 2007c).

**Tribe Molytini** Schönherr, 1823

*Sthereus ptinoides* (Germar, 1824)

Map 50

**Material examined.** New Brunswick, Saint John Co., Saint John, Taylors Island, 45.2248°N, 66.1228°W, 28.VIII.2008, R. P. Webster, sea beach, under drift wood (1, RWC).

**Collection and habitat data.** Anderson (1988) reported this species from under driftwood on beaches of Queen Charlotte Island (official name is now Haida Gwaii), British Columbia. The specimen from New Brunswick was likewise found under driftwood on a sea beach. The adult was collected during late August.

**Distribution in Canada and Alaska.** AK, BC, NB, NS, NF (McNamara 1991c).

**Subfamily Scolytinae** Latreille, 1804

**Tribe Corythylini** LeConte, 1876

Map 51

**Material examined.** New Brunswick, Northumberland Co., Neguac, emerged 18.VI.1969, (no collector given), ex. rust galls on *Pinus banksiana* collected on 26.V.1969 (2, AFC).
Collection and habitat data. Most species of *Pityophthus* in North America breed in twigs (Drooz 1985). Hosts reported for *P. biovalis* include *Pinus glauca*, *P. rubens* and *P. strobus* (Wood 1982). The specimens from New Brunswick were reared from rust galls on jack pine (*Pinus banksiana* Lamb.).

**Distribution in Canada and Alaska.** ON, NB, NS (McNamara 1991d).

*Pseudopityophthus minutissimus* (Zimmermann, 1868)

Map 53

Material examined. New Brunswick, Restigouche, Co., Dionne Brook P.N.A., 47.9064°N, 68.3441°W, 27.VI–14.VII.2011, M. Roy & V. Webster, old-growth balsam fir and white spruce forest, Lindgren funnel traps (5, AFC, RWC).

Nova Scotia, Halifax Co., McNabs Island, 44.612°N, 63.516°W, 9.V.2006, Price / Brawn, Lindgren funnel traps, *Ips* lure (4, AFC); same data but 5.VII.2006, Sweeney/Price, Lindgren funnel traps, *Ips* lure (1, AFC).

Collection and habitat data. Hosts of this rare species in eastern Canada include suppressed *Picea glauca* and *P. rubra* (Bright 1976; Wood 1982). Specimens from New Brunswick and Nova Scotia were captured in Lindgren funnel traps in conifer forests.

**Distribution in Canada and Alaska.** AK, BC, AB, QC, NB, NS (Bright 1976; McNamara 1991d).
Tribe Hylastini LeConte, 1876

*Hylastes opacus* Erichson, 1836**
http://species-id.net/wiki/Hylastes_opacus
Map 54

**Material examined. New Brunswick, Queens Co., Grand Lake near Scotchtown, 45.8762°N, 66.1816°W, 25.VI.2006, R. P. Webster, red oak and maple forest near lakeshore, in litter near vernal pond (1, RWC). York Co., 15 km W of Tracy off Rt. 645, 45.6837°N, 66.8809°W, 10.VI.2007, R. P. Webster, old red pine forest, underside of red pine log, under bark (1, RWC); 15 km W of Tracy off Rt. 645, 45.6848°N, 66.8821°W, 25.IV–4.V.2009, 11–19.V.2009, 19–25.V.2009, 1–8.VI.2009, R. Webster & M.-A. Giguère, old red pine forest, Lindgren funnel traps (10, AFC, RWC); 14 km WSW of Tracy, S of Rt. 645, 45.6741°N, 66.8661°W, 28.IV–10.V.2010, R. Webster & C. MacKay, old mixed forest with red and white spruce, red and white pine, balsam fir, eastern white cedar, red maple, and *Populus* sp., Lindgren funnel trap (1, AFC).

**Collection and habitat data.** Most adults of this adventive species were captured in Lindgren funnel traps in an old red pine and old mixed forest with red pine. One adult was collected from under bark on the underside of a red pine log. Adults were captured in April, May, and June. Bright and Skidmore (1997) reported various species of *Pinus* and *Larix* as hosts for this Palaearctic species where it breeds in stumps and roots of dead and dying trees (Hoebike 1994).

**Distribution in Canada and Alaska.** ON, QC, NB (Bright and Skidmore 1997).

*Scierus annectans* LeConte
http://species-id.net/wiki/Scierus_annectans
Map 55

**Material examined. Additional New Brunswick records, Restigouche, Co., Dionne Brook P.N.A., 47.9030°N, 68.3503°W, 31.V–15.VI.2011, M. Roy & V. Webster, old-growth northern hardwood forest, Lindgren funnel traps (2, NBM, RWC); same locality and collectors but 47.9064°N, 68.3441°W, 31.V–15.VI.2011, old-growth white spruce and balsam fir forest, Lindgren funnel traps (10, AFC, NBM, RWC).

**Collection and habitat data.** This species was captured during June in Lindgren funnel traps in an old-growth northern hardwood forest and an old-growth white spruce and balsam fir forest. Hosts in eastern Canada include *P. glauca* and other *Picea* spp. (Wood and Bright 1992).

**Distribution in Canada and Alaska.** AK, NT, BC, AB, ON, QC, NB, NS, NF (Bright 1976; McNamara 1991d; Wood and Bright 1992). Although Wood and Bright (1992) reported this species as occurring in New Brunswick, Majka et al. (2007b) did not list this species for the province. The above records confirm the presence of this species in New Brunswick.

Map 56

Material examined. New Brunswick, Carleton Co., Jackson Falls, Bell Forest, 46.2152°N, 67.7190°W, 11.V.2005, 1.VI.2005, R. Webster & M.-A. Giguère, river margin forest with butternut, collected with aerial net during late afternoon flight, (5, RWC); same locality and collector but 46.2200°N, 67.7231°W, 28.IV–9.V.2009, 9–14.V.2009, 14–20.V.2009, 20–26.V.2009, mature hardwood forest, Lindgren funnel traps (7, AFC, RWC). Kings Co., Grays Mills, 1.VI.1921, R. P. G., (1, AFC).

Queens Co., Grand Lake Meadows P.N.A., 45.8227°N, 66.1209°W, 4–19.V.2010, R. Webster & C. MacKay, old silver maple forest with green ash and seasonally flooded marsh, Lindgren funnel traps (2, AFC). York Co., South Tweedsfield, 25.X.1977, (no collector given), camp window (20, AFC); Fredericton, 24.VIII.1978 (emergence date), (no collector given), ex. _Fraxinus americana_ (9, AFC); Charters Settlement, 45.8395°N, 66.7391°W, 10.V.2007, 6.V.2008, 4.IV.2010, R. P. Webster, mixed forest, collected with aerial net during late afternoon flights (3, RWC); 15 km W of Tracy off Rt. 645, 45.6848°N, 66.8821°W, 19–25.V.2009, R. Webster & M.-A. Giguère, old red pine forest, Lindgren funnel trap (1, AFC).

Collection and habitat data. Hosts include various species of _Fraxinus_ (Wood 1982). Adults from New Brunswick were captured in Lindgren funnel traps in river margin floodplain forests with butternut, white ash, and black ash (_Fraxinus nigra_ Marsh.), silver maple forest, hardwood forests with American beech and sugar maple, mixed forests, and a red pine forest. _Fraxinus_ was present at all these sites. Adults were also reared from _Fraxinus americana_. This species was collected during April, May, and early June (most during May).

Distribution in Canada and Alaska. SK, MB, ON, QC, NB, NS (Bright 1976; McNamara 1991d).

Giguère, old red pine forest, Lindgren funnel trap (8, RWC); 14 km WSW of Tracy, S of Rt. 645, 45.6741°N, 66.8661°W, 10–26.V.2010, R. Webster & C. MacKay, old mixed forest with red and white spruce, red and white pine, balsam fir, eastern white cedar, red maple, and *Populus* sp., Lindgren funnel trap (1, AFC).

**Collection and habitat data.** Hosts of this species include various hardwood species (Bright 1976; Wood 1982). In New Brunswick, most adults were captured in Lindgren funnel traps during May, June, and July in hardwood forests, red oak forests, red spruce forests with red maple, and an old red pine forest. Numerous adults were collected in ethanol-baited Lindgren funnel traps in an old silver maple forest. Some adults were also reared from a beech bolt.

**Distribution in Canada and Alaska.** ON, QC, NB, NS (Bright 1976; McNamara 1991d; Majka et al. 2007c).
Xyleborinus saxesenii (Ratzburg, 1837)
http://species-id.net/wiki/Xyleborinus_saxesenii
Map 64

Material examined. New Brunswick, Carleton Co., Jackson Falls, Bell Forest, 46.2200°N, 67.7231°W, 16–21.VI.2009, R. Webster & M.-A. Giguère, mature hard-wood forest, Lindgren funnel trap (1, RWC). Queens Co., Cranberry Lake P.N.A., 46.1125°N, 65.6075°W, 12–21.V.2009, 5–11.VI.2009, 11–18.VI.2009, 25.VI-1.VII.2009, R. Webster & M.-A. Giguère, mature red oak forest, Lindgren funnel traps (6, RWC). Sunbury Co., Acadia Research Forest, 45.9866°N, 66.3841°W, 13–19.V.2009, R. Webster & M.-A. Giguère, red spruce forest with red maple and balsam fir, Lindgren funnel trap (1, AFC). York Co., 15 km W of Tracy off Rt. 645, 45.6848°N, 66.8821°W, 15–21.VI.2009, R. Webster & M.-A. Giguère, old red pine forest, Lindgren funnel traps (4, AFC, RWC).

Collection and habitat data. Bright (1976) noted that this adventive species attacks large, dying, deciduous trees and also Pinus and Tsuga spp. In New Brunswick, all adults were captured during May and June in Lindgren funnel traps in
hardwood forests, an old red oak forest, a red spruce forest, and an old red pine forest.

**Distribution in Canada and Alaska.** BC, ON, QC, NB, NS (Bright 1976; McNamara 1991d; Majka et al. 2007c).

**Acknowledgments**

We thank Caroline Simpson (AFC) for editing this manuscript. Patrice Bouchard (CNC), Hume Douglas (CFIA), and an anonymous reviewer are thanked for their many helpful comments that improved this manuscript. Donald Bright, Hume Douglas, Jessica Price, and Marie-Andrée Giguère are thanked for determining some of the Scolytinae, and Jim Goltz for help with plant determinations. We thank Nichole Brawn, Kate Bredin, Katie Burgess, Robert Capozi, Jim Edsall, Marie-Andrée Giguère, Graham Forbes, Nancy Harn, Cory Hughes, Rob Johns, Ervin Kovacs, Marsell Laity, Colin MacKay, Wayne MacKay, Donald McAlpine, P. Poitras, Michelle Roy, F. Roy, Jessica Price, and Vincent Webster for technical assistance and collecting specimens. Claude Chantal is thanked for supplying records of *Plesiobaris disjuncta* from Quebec. We thank Natural Resources Canada - Canadian Forest Service; the Canadian Food Inspection Agency; and USDA APHIS for funding the study on early detection of invasive cerambycids, which provided many specimens in Lindgren funnel traps. The Canadian Wildlife Service is thanked for funding insect surveys at the Portobello Creek National Wildlife Area, the New Brunswick Environmental Trust Fund and New Brunswick Wildlife Trust Fund for funding insect surveys over the past 7 years, and the Meduxnekeag River Association for permission to sample beetles at the Meduxnekeag Valley Nature Preserve (which includes the Bell Forest). The New Brunswick Department of Natural Resources (Fish and Wildlife Branch) this thanked for issuing permits for sampling in the Protected Natural Areas and providing logistical support. Survey work in the Jacquet River Gorge Protected Natural Area was organized through the New Brunswick Museum, with external funding from the New Brunswick Environmental Trust Fund, Salamander Foundation, and the New Brunswick Wildlife Trust Fund.
