Corrigendum

The ATP-dependent chromatin remodeler Chd1 is recruited by transcription elongation factors and maintains H3K4me3/H3K36me3 domains at actively transcribed and spliced genes

The Authors would like to correct a missing funding source in their paper. The complete funding statement should be the following:

Funded in part by National Institutes of Health [CA095548 and CA198648] and Cancer Prevention and Research Institute of Texas [RP120194] to V.R.I. and KIST Intramural Research grant [2E26910] to D.P.

This has now been corrected online.
