Received 2012 December 14; published 2013 January 9

Due to an error at the publisher, the third sentence in the sixth (second from the last) paragraph of Section 4 of the published version of this article contains a mistake. The published version reads:

Note that the high-mass sample shows a stronger trend for the color gradient but a weaker trend for the color gradient, compared to the trends in the intermediate-mass sample.

Here, the former gradient should be removed, which results in the correct sentence as follows:

Note that the high-mass sample shows a stronger trend for the color but a weaker trend for the color gradient, compared to the trends in the intermediate-mass sample.

IOP Publishing sincerely regrets this error.
