### Contents

| S.No. | Title                                                                 | Page. No |
|-------|-----------------------------------------------------------------------|----------|
| 1.    | A new high yielding dual purpose sorghum variety CO 32 for Tamil Nadu | 1-8      |
|       | B. Selvi, K. Ganesamurthy, S. Sivakumar, P. Jeyaprakash, A. Yuvaraja, D. Kavithamani, R. Latha, N. Malini, R. Kalpana, S. Manoranjitham, A. Sudha, P. Anandhi, S. Manimegalai, N. Vadivel, T. Srinivasan, P. Vennila, R. Ravikesavan and S. Geetha |          |
| 2.    | A new high yielding proso millet variety (*Panicum miliaceum* L.): PMV 442 | 9-16     |
|       | C. Nandini, Sujata Bhat, Prabhakar, Jayaramegowda, M. Krishnappa, S. Srinatha Reddy, Prabhu C. Ganiger, K. B. Palanna, T. S. Sukanya, B. Boraiah, Kiran, T. Lavanya Bai and N. Vinay |          |
| 3.    | A high green fodder yielding Cumbu Napier hybrid grass CO 6 suited for the states of Central and North Western Zones | 17-21    |
|       | C. Babu, R. Sudhagar, K. Iyanar, S. D. Sivakumar, T. Ezhilarasi, K. Ganesamurthy and S. Geetha |          |
| 4.    | Genetic divergence study for duration and biomass traits in sorghum [*Sorghum bicolor* (L.) Moench] | 22-27    |
|       | Ajay Prasanth, Ameena Premnath and Raveendran Muthurajan |          |
| 5.    | Improvement of rice cultivar for bacterial blight disease through marker assisted breeding approach | 28-36    |
|       | Mudra Khare, Ravi, P. Singh, T. Ram, Ashutosh Yadav, Ramdeen and Amita Sharma |          |
| 6.    | Genetic diversity analysis in blackgram [*Vigna mungo* (L.) Hepper] | 37-45    |
|       | A. K. Chippy, M. Arumugam Pillai and D. Shoba |          |
| 7.    | Identification of QTL linked to heat tolerance in rice (*Oryza sativa* L.) using SSR markers through bulked segregant analysis | 46-53    |
|       | Swapnil Gorakh Waghmare, P. Sindhumole, Deepu Mathew, M. R. Shylaja, Rose Mary Francies, P. S. Abida and M. C. Narayankutty |          |
| 8.    | Discriminate function analysis in cowpea (*Vigna unguiculata* (L.) Walp.) | 54-57    |
|       | C. Bamji Rukhsar, M. S. Pithia and L. J. Raval |          |
| 9.    | Study on character association in *Lens culinaris* medik. | 58-65    |
|       | Soumya Satpathy, Sandip Debnath and Abinash Mishra |          |
| 10.   | Assessment of genetic diversity in linseed germplasm using morphological traits | 66-73    |
|       | Naresh Kumar and Vijay Kumar |          |
| 11.   | Variability among different yield and yield contributing traits of Okra (*Abelmoschus esculentus* L. Moench) genotypes | 74-81    |
|       | Aman Deep Ranga, Sourav Kumar and Mayur S. Darvankar |          |
| 12.   | Gene action and combining ability of yield and yield related characters in genetically diverse lines in yard long bean [*Vigna unguiculata* ssp. *sesquipedalis* (L.) Verdc.] | 82-85    |
|       | B. Lovely and V. Kumar |          |
| 13.   | Association studies with direct and indirect effects among different morpho-bio traits in *Gossypium arboreum* | 86-90    |
|       | Pooja, Omender Sangwan, S.R Pundir, Meenakshi Rathi and Shivani Mandhania |          |
| 14.   | Characterization of pumpkin (*Cucurbita moschata* Duch. Ex. Poir.) germplasm through genetic variability, heritability and genetic advance | 91-96    |
|       | MD. Ramjan |          |
| 15.   | Line x tester mating design analysis with GMS based system for seed cotton yield, its component traits and fibre quality parameters in Asiatic cotton (*Gossypium arboreum* L.) | 97-103   |
|       | S. K. Verma, Shaifali Goyal and O. P. Tuteja |          |
|   | Title                                                                                     | Authors                                                                                           | Pages   |
|---|--------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|---------|
| 16| Genetic appraisal of frost damage in mulberry germplasm accessions in temperate climate of Jammu and Kashmir, India | Azad Gull, G. K. Ramegowda and Irfan Illahi                                                    | 104-108 |
| 17| A novel high yielding dual-purpose sorghum variety GDJ1 (Banas Surya) for semi-arid region of Gujarat | R. A. Gami, R. N. Patel, P. R. Patel and S. K. Jain                                               | 109-121 |
| 18| Genetic analysis in F3 generation of pumpkin (Cucurbita moschata Duch Ex. Poir)               | V. Krishnamoorthy and T. V. Avinashgupta                                                         | 122-128 |
| 19| An assessment of genetic diversity and combining ability of elite castor genotypes suitable for rainfed conditions | Lavanya Cherukupalli and N. Mukta                                                               | 129-136 |
| 20| A high biomass yielding legume fodder variety Desmanthus CO 2 suited for all states of India | K. Iyanar, A. Kalamani, C. Babu, R. Sudhagar, S. D. Sivakumar, Ameena Premnath, T. Ezhilarasi, K. Ganesamurthy and S. Geetha | 137-141 |
| 21| Morphological and molecular characterization of desi cotton (Gossypium herbaceum L.) landraces collected from different states of India | M. Saravanan, R. C. Misra, S. S. Mahajan, D. V. Patil and V. N. Waghmare                      | 142-150 |
| 22| Identification of high yielding inbred lines resistant to late wilt disease caused by Harpophora maydis in maize | K. Aruna, E. Gangappa, S. Ramesh and D. S. Swamy                                              | 151-158 |
| 23| Genetic diversity in foxtail millet genotypes                                                | Tirumala Jawahar Sri Gopi, I. Shankergoud, L. N Yoogesh, Ayyangowda Patil, B. V. Tembhumine, Basave Gowda, Mallikarjuna Kengnal | 159-162 |
| 24| Tailoring genetic diversity of greengram genotypes through principal component and cluster analysis | K. V. Patel, D. J. Parmar, V. B. Kundaria, H. P. Patel and B. N. Patel                          | 163-169 |
| 25| Genetic variability studies for horticultural traits in muskmelon (Cucumis melo L.)         | G. Indraja, Sadarunnissa Syed, C. Madhumathi, B. Tharunji Priya and M. Reddi Sekhar              | 170-176 |
| 26| Morphological and molecular diversity of thermosensitive genic male sterile lines in rice (Oryza sativa L.) | K. Sai Rekha, R. Saraswathi, M. Kumar, S. Manonmani, M. Raveendran and S. Robin              | 177-182 |
| 27| Growth and yield performance of diverse genotypes of tomato (Solanum lycopersicum L.)       | Biyyala Srinivasulu and Pradeep Kumar Singh                                                       | 183-187 |
| 28| Diversity assessment and selection of candidate plus trees of Ailanthus triphysa (Dennst.) Alston in Kerala | Jes Lahnunpuia, A. V. Santhoshkumar, T. K. Hrideek, E. V. Anoop and P. Manju Elizabeth | 188-194 |
| 29| Proso millet national variety TNAU 202                                                       | A. Nirmalakumari, A. Subramanian, S. Manoharan, T. Raguchander, P. Veerabadhri, K. Thiyagarajan, M. Paramathma and C. Priyadharshini | 195-199 |
| 30| Development and evaluation of early maturing thermo-tolerant Indian mustard (Brassica juncea L. Czern & Coss) genotypes for cultivation in semi-arid region of India | Bhagirath Ram, Priyamedha, M. S. Sujith Kumar, H. K. Sharma, Reema Rai, K. H. Singh, V. V. Singh, Vinod Kumar and P. K. Rai | 200-206 |
| 31| Genetic improvement of palmarosa (Cymbopogon martini var. motia) for herbage and essential oil yield through polycross method of breeding | G.R. Smitha and P. Manivel                                                                         | 207-215 |
| 32| Characterization of Jatropha hybrid clones grown under subtropical conditions of South India | K. T. Parthiban, S. Revathi, C. Cinthia Fernandaz and M. Umadevi                                  | 216-223 |
|   | Title                                                                 | Authors                                                                 | Page Numbers |
|---|----------------------------------------------------------------------|-------------------------------------------------------------------------|--------------|
| 33. | Correlation and path coefficient studies for fruit component traits in coconut (Cocos nucifera L.) hybrids | V. Sivakumar, S. Geethanjali, A. Subramanian, S. Praneetha, H. P. Maheswarappa and D. Rajkumar | 224-227      |
| 34. | Genetic divergence among Ramnad mundu chilli (Capsicum annuum L.) genotypes for yield and quality | J. Phani Kumar, P. Paramaguru, T. Arumugam, N. Manikanda Boopathi and K. Venkatesan | 228-234      |
| 35. | Assessment of stability performance and G X E interaction for yield and its attributing characters in bread wheat (Triticum aestivum L.) | Anuj Kumar, Pooran Chand, Ravi Singh Thapa and Tejbir Singh | 235-241      |

**Research Note**

|   | Title                                                                 | Authors                                                                 | Page Numbers |
|---|----------------------------------------------------------------------|-------------------------------------------------------------------------|--------------|
| 36. | Genetic improvement of greengram (Vigna radiata (L.) Wilczek) for yield through pod and seed characters | A. Mahalingam, N. Manivannan and S. Ragul                                       | 242-245      |
| 37. | A5 cytoplasm: way to three way forage pearl millet hybrids           | Sarabjeet Singh, R. Bhardwaj and R. S. Sohu                             | 246-248      |
| 38. | Correlation and path analysis studies on yield and yield components in brinjal (Solanum melongena L.) | D. Rameshkumar, R. Swarna Priya, B. K. Savitha, R. Ravikesavan and N. Muthukrishvnan | 249-252      |
| 39. | Genetic variability and yield analysis in rice                       | Sahanab Nath and P.C. Kole                                               | 253-258      |
| 40. | Genetic studies in F2 generation of bhendi [Abelmoschus esculentus (L.) Moench] | R. Janarthanan and V. Sundaram                                             | 259-262      |
