| Activity Name             | Description                                                                                                                                 |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| Self-Portrait             | Participants are encouraged to think about what makes them unique. They can draw or paint a portrait that represents them.                  |
| Emoji Masks               | Participants can make Emojis using a tablet to represent their feelings in the hospital.                                                   |
| Dolls and Puppets         | Participants are given a small, white cushion to decorate and make into a puppet/doll. They are encouraged to describe how it reflects themselves.|
| The Best Part of Me       | Participants can take a picture of the favorite part of themselves and paste the picture on a paper. They are asked to describe why they chose that part. |
| Body Maps                 | Using a diagram of a brain or heart, participants are encouraged to draw or write over the template to show their feelings and thoughts.        |
| Photo Collage             | Participants can take pictures of personal items they brought to the hospital, paste the pictures on a piece of paper, and draw items they wish they had. |
| Modeling                  | Participants are given modeling dough to create figurines. They may decorate their creation with materials in the art-cart.                   |
| My Favorite Place         | Participants are encouraged to think about their favorite place, then to paint or draw it.                                                 |
| Exquisite Corpse          | This is a collaborative art project: one member draws a head, then folds that section so it is concealed. The next person draws the following body part and repeats the above steps until the drawing is finished. |
| Sports and Games          | Participants are given cardboard and other recycled materials from which to construct a game they can play while at the hospital or during the day. |
| Clock                     | Using a clock template, participants can draw or paint how they use their time during the day.                                              |
| Finish that drawing       | A collaborative art project where each member must draw a line continuing off of what the previous person drew.                              |
| Free Style                | Using any of the materials in the art cart, participants can create anything they want.                                                   |
