Mission and Focus

Stem Cells Translational Medicine works to advance the utilization of cells for clinical therapy. By bridging stem cell molecular and biological research and helping speed translations of emerging lab discoveries into clinical trials, Stem Cells Translational Medicine will help move applications of these critical investigations closer to accepted best patient practices and ultimately improve outcomes.

The journal encourages original research articles and concise reviews describing laboratory investigations of stem cells, including their characterization and manipulation, and the translation of their clinical aspects from the bench to patient care. Stem Cells Translational Medicine covers all aspects of translational studies, including bench research, first-in-human case studies, and relevant clinical trials.

JOIN WITH COLLEAGUES THROUGHOUT THE WORLD WHO ARE ADVANCING
CORD BLOOD BANKING AND THERAPIES

$99 (USD) annual dues for individual membership

PROFESSIONAL BENEFITS
- Expand demand for cord blood products and services
- Develop industry standards and best practices
- Educate health care professionals and expectant parents about options for cord blood donation and banking
- Inform legislators, regulators, the media and the general public about the benefits and the future of cord blood
- Advocate for policies that improve health, save lives and improve medicine

PERSONAL BENEFITS
- Stay informed about issues that affect cord blood banking
- Keep up to date on emerging technologies such as stem cell expansion and homing, and applications in regenerative medicine
- Network with peers in cord blood banking, research and therapy
- Receive discounts on meeting and conference registrations, including the Cord Blood Connect international congress
- Participate on committees that are shaping the future of the cord blood community

Apply for membership online at:
www.cb-association.org
The 14 organizations collaborating on Cord Blood Connect want to thank the major supporters of the Congress.
