Eagle Rock Web Design Website Requirements

Goal: To build a new single-page website from scratch, for a company (Eagle Rock Web Design). The goal of the website is to drive traffic and be a landing page where potential customs can preview services offered by the company. I'd like the website to be VERY modern looking, with icons, buttons, fonts that are all up to date. This website is very important and must look clean and elegant, as it is a landing page for clients to see WEB DESIGN work.
Line of Business: Website creation and hosting

Anything in Italic is notes for designer. Don't add that text in the design
