 **App**  Files  Community  Settings

Get started with your gradio Space!

Your new space has been created, follow these steps to get started (or read our full [documentation](#))

Start by cloning this repo by using:

```
$ git clone https://huggingface.co/spaces/fgs22002/minimal
```

Create your Gradio app.py file:

```
import gradio as gr

def greet(name):
    return "Hello " + name + "!!!"

iface = gr.Interface(fn=greet, inputs="text", outputs="text")
iface.launch()
```

Then commit and push:

```
$ git add app.py
$ git commit -m "Add application file"
$ git push
```

(Hint: **Create** the app.py file right in your browser alternatively)

Your app should be running on this page after a few moments !

Dependencies

You can add a [requirements.txt](#) file at the root of the repository to specify Python dependencies

If needed, you can also add a [packages.txt](#) file at the root of the repository to specify

Debian dependencies.

The [gradio](#) package comes pre-installed at version [latest](#)

Documentation

Check out the full documentation of gradio Spaces [here](#)
