

My new sheet

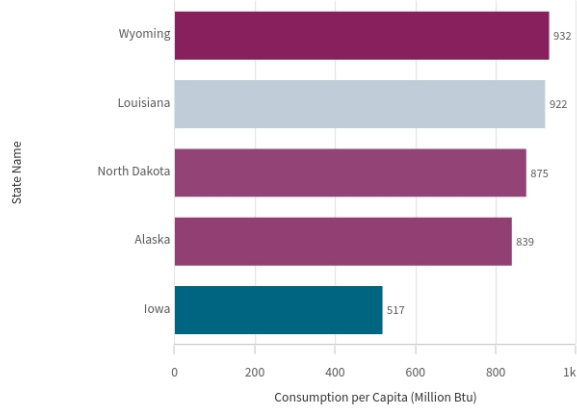

NOTES:

1. This dashboard is meant to be used as a way to explore energy stats for your state and the U.S. as a whole.
2. This data only covers the year 2019 and for U.S. states only.
3. All data was downloaded from [here](#).

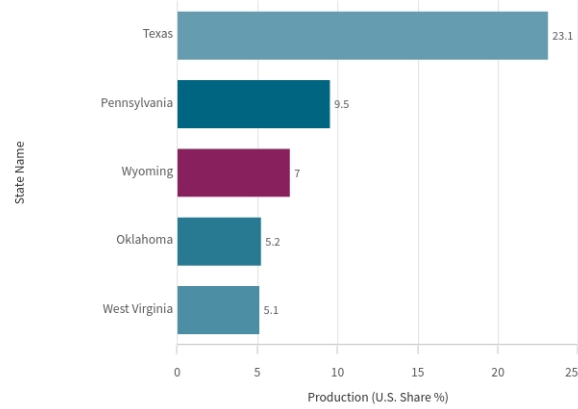

OBSERVATIONS:

1. East and West coast states appear to consume less energy per capita than the southern and centrally located states.
2. Energy production and consumption appear to trend downwards with a decrease in energy expenditures.

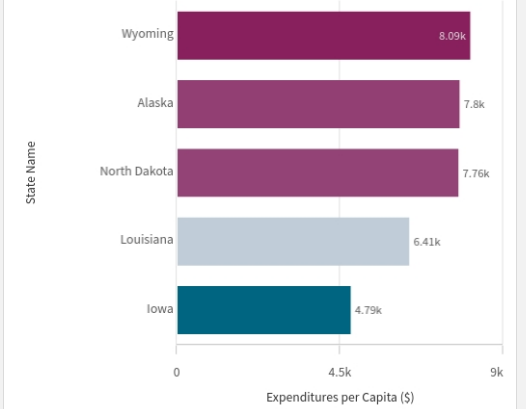

Top 5 Energy Consumers by State

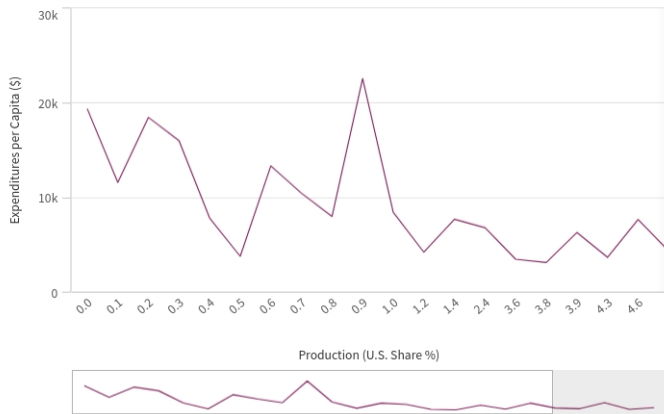

Top 5 Energy Producers by State

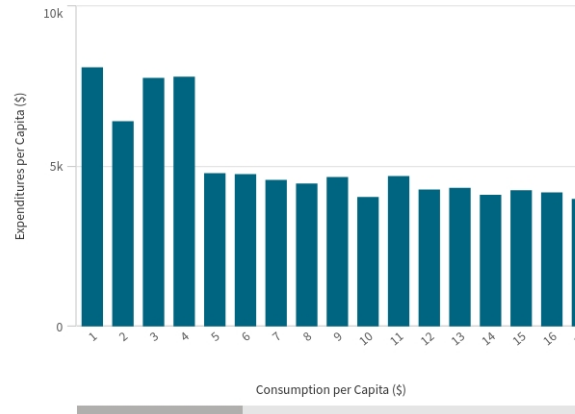

Top 5 Energy Expenditures by State

Energy Expenditures vs Production

Energy Expenditures vs. Consumption

Energy Consumption per Capita (Rank) by State
